

McCarty Road North Bridge Replacement Project

FM#: 434360-1-52-01

McCarty Road North Bridge Full Closure Begins Week of July 31

Starting the week of July 31, 2017, McCarty Road (County Road 712A) will undergo a full around-the-clock closure from Twin Creeks Drive north for 0.12 miles to facilitate bridge replacement. This full closure is anticipated to last for approximately 9 months, weather permitting. During this time, motorists should detour via Okeechobee Road or Midway Road to Shinn Road (see detour below).

This work is part of the McCarty Road North Bridge replacement project from Twin Creeks Drive north for 0.12 miles. Work on this project includes: replacing the McCarty Road Bridge over Ten-Mile Creek, raising the bridge approximately 2 feet above the existing bridge elevation to better accommodate flood creek water elevations; replacing both approach slabs; roadway reconstruction and widening immediately north and south of the new bridge; drainage improvements including new inlets and installation of a French-drain system and providing slope protection/channel lining below the bridge to prevent erosion; and installing signing and pavement markings. The new bridge configuration will be a two-lane undivided road with 12' lanes, outside shoulders, and a sidewalk on the east side of the bridge.

If you have any questions, comments, or concerns please contact Kathleen Dempsey, Project Community Outreach Specialist, at (772) 359-5118, kdempsey@corrado.com, or visit www.d4fdot.com.
