# Project Overview

## Objective:

1. Provide relief from existing and projected traffic congestion by improving traffic operations along I-75
2. Improve safety by addressing speed differences between lanes

# Project Overview

## Background:

- The I-75 corridor was initially constructed in the 1980s
- Significant population growth has occurred in Broward County since I-75 was built
- I-75 Multi-Modal Master Plan completed in 2006, identified potential future improvements for the corridor, which included addition of auxiliary lanes, express lanes and modifications to multiple interchanges
- I-75 Project Development and Environment (PD&E) Study was completed in 2012, evaluating different alternatives and impact of these previously identified improvements
- Improvements identified in previous studies were divided into multiple projects that have been transforming the corridor to better serve the current and future needs of the community.
